CAT & Genny Training

About Us

Cal Services have been providing CAT & Genny training to businesses throughout the UK, and also on site at our premises in Weston-super-Mare for over a decade.

We are highly experienced through repairs, service and manufacture of the equipment and are a known name in the industry for our prompt delivery and outstanding customer service.

CAT & Genny Training Course Duration:

Half Day – up to 10 Candidates

Full Day – up to 20 Candidates (Split Morning & Afternoon)

Smaller groups can be catered for.

Cable Avoidance Tools Covered

We cover all ranges of CAT & Genny including:

Radiodetection

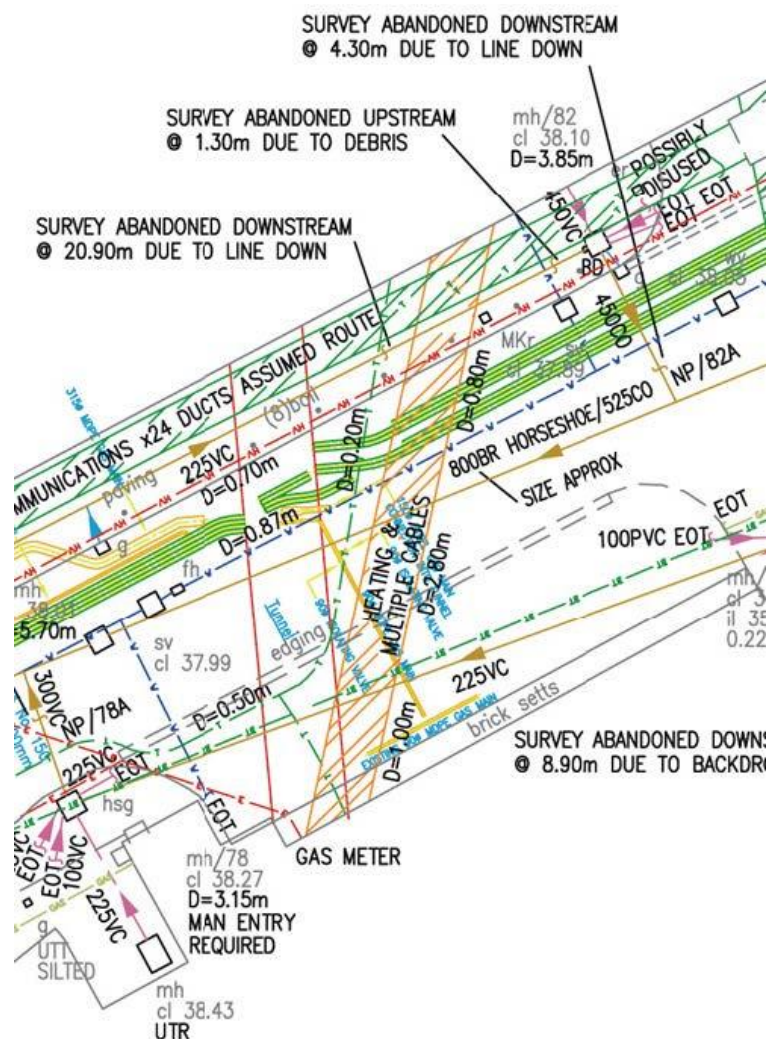

CScope

Leica Ezicats

Tomkats

Vivax vScan

Please note: If you are attending a training session at our premises you are welcome to bring your own equipment on the day which can be checked and calibrated while undertaking the course (extra cost incurred)

Cat & Genny Training Course Overview

Aim

The aim of cable avoidance tools (C.A.T & Genny) training is to provide both site operatives and construction supervisors with the skills and knowledge to effectively and safely carry out cable avoidance work.

Who Should Attend?

CAL Services Cable Avoidance & Location training programme is purposely designed for supervisors and any operatives who are assigned the responsibility of locating or avoiding underground utilities in construction, repair or maintenance work on any roadways and highways in the UK.

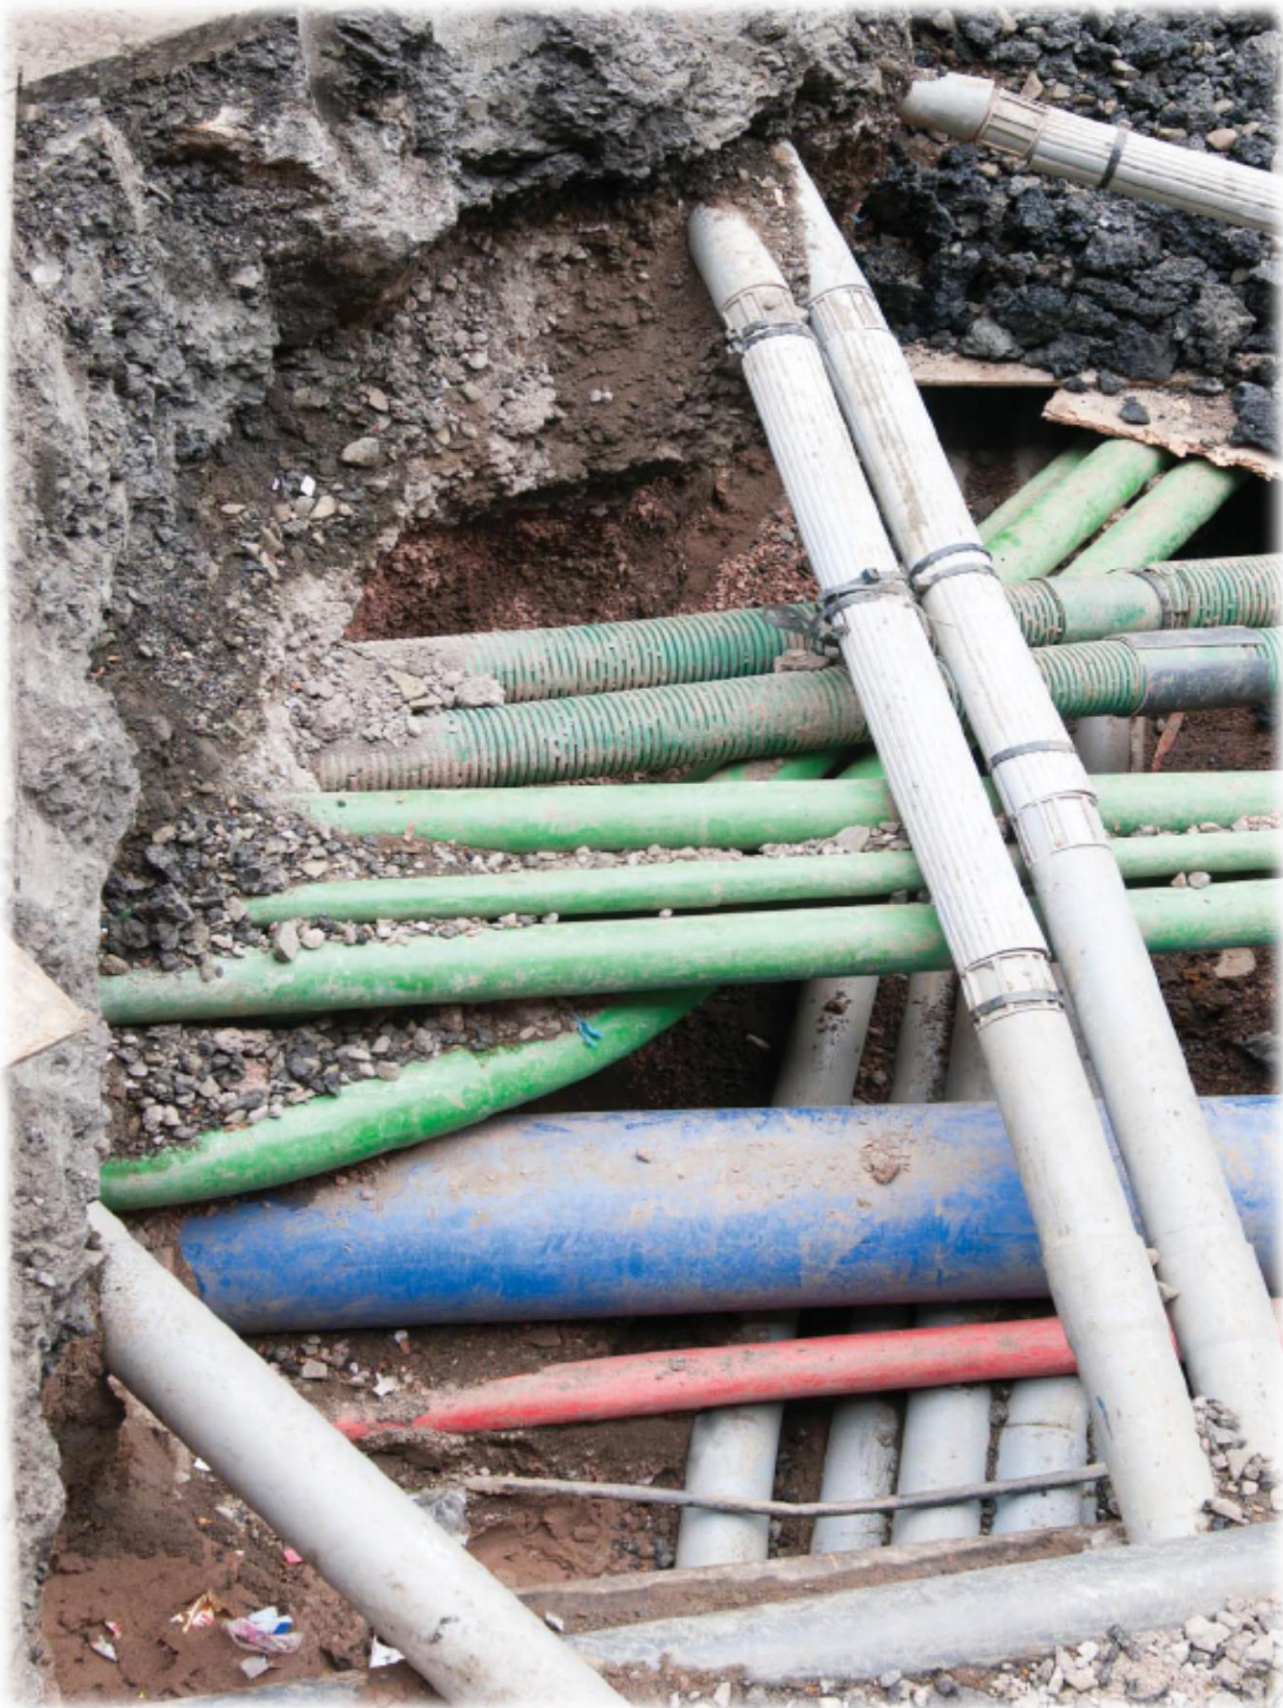

You will learn:

- Basic working principles of location and avoidance of installed underground services.
- Hazard identification procedures and the key risks associated with these.
- Theory and understanding of how cable location equipment works.
- Practical and safe use of equipment.

Successful completion of our CAT & Genny training course will allow candidates to:

- Identify potential risks to both themselves and others.
- Understand the principles of how cable locators work.
- Operate cable avoidance tools safely effectively, in order to locate and/or avoid existing underground services.
